

# Day 0: Hello, World.

## Objective

In this challenge, we review some basic concepts that will get you started with this series. Check out the [Tutorial](#) tab for learning materials and an instructional video!

## Task

To complete this challenge, you must save a line of input from stdin to a variable, print `Hello, World.` on a single line, and finally print the value of your variable on a second line.

You've got this!

**Note:** The instructions are Java-based, but we support submissions in many popular languages. You can switch languages using the drop-down menu above your editor.

## Input Format

A single line of text denoting *inputString* (the variable whose contents must be printed).

## Output Format

Print `Hello, World.` on the first line, and the contents of *inputString* on the second line.

## Sample Input

Welcome to 30 Days of Code!

## Sample Output

Hello, World.  
Welcome to 30 Days of Code!
